linkedin.com/in/lotfi-djebbar | github.com/LotfiDjebbar

PROFILE

Final-year Data Science & AI engineering student (ENP Algiers), specialized in NLP, multi-agent systems, and production data solutions. Built and deployed a multi-agent RAG system for natural-language ERP querying at CETELEX (100 % execution rate, CPU-only production VPS), and authored a from-scratch Transformer encoder for Algerian dialect sentiment classification (79.4 % accuracy, research-style report). Seeking a 5–6 month graduation internship (PFE) starting February 2027 in data & AI solutions.

EDUCATION

École Nationale Polytechnique d'Alger (ENPA)

Algiers, Algeria

State Engineering Degree (5-year): Industrial Engineering, Data Science & AI track

2024 – Present

- Ranked 17th of 844 in the national entrance exam to the engineering cycle. Specialty-year GPA: 14.04/20 (S3), 14.8/20 (S4).

École Nationale Polytechnique de Constantine (ENPC)

Constantine, Algeria

Preparatory Classes in Science and Technology — Ranked 32nd of 330 students

2022 – 2024

PROFESSIONAL EXPERIENCE

CETELEX Technology (Odoo Silver Partner)

Algiers, Algeria

AI Engineer — Work-Study Program

September 2025 – May 2026

- Designed and deployed to production a multi-agent RAG system (CrewAI, LangChain) enabling natural-language querying of an Odoo 18 ERP.
- Semantic matching pipeline (cosine similarity + threshold): direct SQL template execution vs. LLM fallback (Qwen2.5 via Ollama); vector storage with pgvector/PostgreSQL.
- Production results on a CPU-only VPS: 100 % execution rate, P50 latency of 0.03s.
- Deliverables: 40-page technical report (L^AT_EX), defense presentation, and full documentation.

Industrial Observation Internships — Hikma Pharma & Biscuiterie de Cherchell

Algiers & Cherchell

Information systems, process digitalization, supply chain

January – June 2025

PROJECTS & COMPETITIONS

Darija Transformer — Sentiment Classification for Algerian Dialect | PyTorch, NLP

2026

- Transformer encoder implemented from scratch (multi-head attention, sinusoidal positional encoding, encoder blocks) without high-level libraries — 79.42 % accuracy (F1 macro 0.794) on a code-switched Arabic/French/arabizi corpus.
- Quantitative audit of 3 candidate corpora (documented rejection of 2 datasets with invalid dialectal labels); custom ByteLevel BPE tokenizer (12k vocabulary); rigorous comparison vs. fine-tuned DziriBERT (124M parameters) on an identical split.
- Manual re-annotation of 90 errors revealing ~31 % source-corpus annotation mistakes; 4-page research-style report + public repository: github.com/LotfiDjebbar/darija-transformer.

Automatic Quiz Generator from PDF Documents | NLP, LLMs

2025

- Question-generation tool from PDF documents, benchmarking rule-based approaches, BERT, Flan-T5, and Gemini. Repo: github.com/LotfiDjebbar/quizz-generator.

Hackathon Algeria 2.0 — AgriDataInsight (2nd place) | Data Science

2025

- Data-driven solution for the agricultural sector, built in a team under time constraints. Repo: github.com/LotfiDjebbar/Agrovisor.

TECHNICAL SKILLS

AI / NLP: PyTorch, Transformers (attention, BPE tokenization), CrewAI, LangChain, Ollama, pgvector, RAG, fine-tuning (DziriBERT, BERT), scikit-learn.

Languages: Python, C, C++, SQL, MATLAB, JavaScript/HTML/CSS.

Data & tools: PostgreSQL, Power BI, Excel, Git/GitHub, L^AT_EX, Linux, Odoo 18.

Spoken languages: Arabic (native), French (fluent), English (professional).

LEADERSHIP & CERTIFICATIONS

IEC & VIC student clubs (ENPA) — Communication & HR; organizer of the Business Game and the Algerian Engineering Competition (since Sept. 2024).

COIL — Foundations of NLP: From Text Preprocessing to Sentiment Analysis (Certificate of Distinction, 30h) — international program with Taras Shevchenko National University of Kyiv, Georgia State University, University of Central Arkansas, Karunya Institute & ENP Algiers (April 2026).

Prompt Engineering with LLaMA-2 — iXL Consulting (2025).
